

**About Anglo-Eastern**

Are you interested in joining a global leader in ship management and an industry powerhouse with a family feel? Headquartered in the vibrant city of Hong Kong, we've been at the helm of the maritime industry for 50 years, with our comprehensive suite of services encompassing all aspects of ship management, crew management, cruise management and technical services across all vessel types and sizes. Our reach is truly worldwide, with a presence in over 29 locations across Asia-Pacific, Europe, and the Americas. At Anglo-Eastern, we're more than just a service provider; we are innovators, problem-solvers, and pioneers, that are progressively setting the standard so that we can shape a better maritime future.

**The Technical Department**

The Technical Department is responsible for the maintenance, repair, and overall technical management of the company's fleet. This team ensures that all vessels operate efficiently and safely by overseeing routine inspections, troubleshooting technical issues, and implementing preventive maintenance programs. They work closely with other departments to ensure compliance with maritime regulations and industry standards.

**What We Are Looking For**

We are seeking a driven and talented individual to join our team in Athens as a Technical Intern to support in technical tasks according to the current ongoing projects and cases. We are looking for students that share Anglo-Eastern's values, work well in a team, and are passionate about making a positive impact. We believe that the right attitudes and behaviours can be more important than specific skills or experience.
